

THE WORLD OVER

COOL RECEPTION FOR MINISTER

FEMBERTON, B.C.—The following incident which happened last August, is now being related. "Hon. J. G. Gardiner, Federal minister of agriculture, and J. G. Targuen, M.P., had a cool reception at Femberton today—but it was an accident. The plan of the two men was to land on the river, but couldn't make shore. So a tugboat came and towed them in. The canoe upset and as it neared the shore and the two politicians got a dunking."

GRAIN MUST TRAVEL EAST

Grain terminals at the Pacific coast have absorbed all the wheat possible to store at the present time, with the result that grain trains are now moving east to Port William rather than westwards to Vancouver, officials of the C.P.R. state.

Nearly 12,000 cars of grain have been checked through Calgary during the past six weeks, comprising the heaviest shipment of grain during the past ten years.

Officials of the Canadian Wheat Board stated that while coast terminals are at capacity, what with the grain already stored there and the trains now en route, Alberta farmers will still be paid on the basis of Vancouver shipments, despite the fact that the grain will be moved east for some time.

Up until this week, 85 per cent of the grain shipped moved west. During the past week, however, only 70 per cent of the grain shipped has been heading east.

MARQUIS WHEAT LOSING OUT

In 1936 Marquis wheat occupied 59 per cent of the total area seeded to wheat in the three Prairie Provinces. This last spring, however, only 54 per cent was seeded to Marquis.

Marquis has lost ground to the rust-resistant wheat—Thatcher—and, to a slight extent, to the still newer rust-resistant sorts, Renown and Apex. The tendency for the replacement of Marquis by these rust-resistant sorts is still going on, however, at a rapid pace. It is probable, therefore, that after next seeding, while Marquis will still be the dominant wheat in Western Canada, the percentage of land seeded to this notable variety will be considerably less than 50 per cent.

The second most popular variety now is Thatcher, occupying 14 per cent, displacing Carleton, which was second in 1936. Red Bobs is now in third place with 10 per cent. Garnet has fallen to fourth place with 8 per cent of the acreage. After Garnet comes Renown with 6.7 per cent.

We understand that still better varieties of rust-resistant wheats are now in process of being developed by the Dominion Rust Research Laboratory, which originated them, and if any of them are found suitable in every way they will be licensed for use in the near future.

In Alberta Marquis occupies 44.8 per cent of the acreage in wheat, Red Bobs 25.5 per cent, Garnet 10.0 per cent, Renown 6.3 per cent, Durham 3.1 per cent, and Thatcher 3.0 per cent, with miscellaneous varieties 2.1 per cent.

VOLUME 17; NUMBER 36

215,000 BUSHELS OF GRAIN MARKETING IN CARBON THIS FALL

Estimated Total of 200,000 Bushels Will Be Marketed Here

Harvesting is about 90 per cent completed in the Carbon district and to date about 215,000 bushels of grain have been handled by the four Carbon elevators. Besides this there has been considerable grain marketed at Sharpley and Estrie, and to a lesser extent at Henshew where disastrous hail storms wiped out a large part of the crop.

Reliable estimates place the total marketable grain at Carbon for the crop year at 200,000 bushels. This means that there is another 85,000 bushels to be hauled in between now and next July. In other words, approximately 75 per cent of the grain has been marketed since harvesting began. This is a large increase in crop handling compared with former years, when it was customary to haul in only 50 per cent of the grain. With the present year and the low market price, there has been no incentive for the farmer to hold his grain, and this is a large extent accounts for the heavy deliveries this fall.

LITTLE ITEMS OF LOCAL INTEREST

Master Gerald Oliphant entertained a few of his young friends and their mothers at his first birthday party on Tuesday afternoon.

Mr. and Mrs. Harney left Monday for Edmonton where Mr. Harney will enter the hospital for a mastoid operation.

Mrs. McNaughton received word on Monday of the sudden passing of Mr. Capner at Edmonton and Mr. and Mrs. McNaughton left Monday for the northern city.

LONG YEARS AGO

October 6, 1927

R.B. Cox, farmer four miles north west of Carbon, accidentally shot himself while climbing through a fence on his farm, and the charge entered his head, killing him instantly.

The fairways on the golf course are now free of long grass and ideal golfing weather prevails.

Alfred Braisher left this week to attend technical school in Calgary.

Mr. R. Heath was rushed to the Holy Cross hospital, Calgary, last Friday afternoon and was immediately operated on for appendicitis.

ATHABASCA BY-ELECTION

Voting in the Alberta provincial by-election in the Athabasca constituency is to take place November 7 with nominations October 29th. The by-election was necessitated by the death of C.C. Ross, former minister of lands and mines, in Vancouver September 14. The seat was won by C.H. Tade, Social Credit, in the 1935 Alberta general election, but Mr. Tade resigned to permit a vacancy for Mr. Ross to enter the cabinet. No nominations have yet been made but it is reported Mr. Tade may again be the Social Credit candidate. Other parties have not indicated definitely if they will enter the field.

LITTLE ITEMS OF LOCAL INTEREST

Stanley King left Thursday last to join the British navy at Esquimaux.

Mr. H.T. Sobey is away this week in the Coronation district, where he is collecting for the Crown Lumber Co. of Vancouver, B.C., about 250,000 bushels of grain. He is in charge of the lumber yard.

The baseball club held a very successful season in the Farmers' Exchange ball, Carbon, last Friday night, and we understand that a sum of around \$20 was cleared after all expenses were paid.

The weather has turned cool after about two months of fine warm days and a light rain set in Monday. We need all the moisture we can get now for our winter crops.

—Comes to the Boy Scout and Wolf Cub Whist and Bridge Drive, in the I.O.O.F. Hall on Friday, October 14th, at 8:00 p.m. Entertainment by the I.O.O.F. Lunch provided. Admission 25c.

Mrs. Jasper Rochester returned to her home in Hinton on Wednesday after spending a few days visiting in Carbon.

Mrs. Bruce Ramsay and Barry left Carbon Sunday for their new home at Craigmile.

Mr. and Mrs. H.C. Willson returned Thursday from a short visit to the south-eastern part of the province.

Mr. and Mrs. Jas. Smith and son, and Mrs. B.C. Downey were Drum-beller visitors last Thursday.

Mrs. Jas. Ramsay returned to her home in Calgary on Saturday after spending the past week visiting with her son and daughter-in-law, Mr. and Mrs. Bruce Ramsay.

S. F. Torrance, Mr. and Mrs. A. Hay and Mr. and Mrs. J. Atkinson Sr. lunch in the sale at the E.P. ranch last Friday.

The ladies of St. Gabriel's church held a very successful tea on Saturday afternoon at the home of Mrs. G. Trepanier. The winner of the comforter that was raffled off was Jake Doerkson.

RAISE BETTER GRADE EGGS

With the establishment of an egg-grading station in Carbon, farmers are advised to take better care of their hens and thus get a better grade for their eggs. The following simple routine is beneficial to egg producers: Canadian Standards for Egg Grades require that eggs to be graded must be clean. Clean as applied to eggs means free from spot or stain.

By following the following routine in handling and marketing your eggs you will obtain a larger percentage of "A" grade eggs.

1. Keep clean litter on floors and in nests.
2. Gather your eggs often and keep them in a cool, dry room free from odours. Eggs deteriorate very quickly when subject to temperatures of 70 degrees F or greater. This fact is not generally realized as the shell hides all evidence of decay.
3. Market your eggs regularly, in clean cases equipped with clean filters and flats.
4. Remove male birds from your flock immediately after the breeding season. A rooster contributes nothing to egg production and fertile eggs when subject to temperatures of 70 degrees F or more will develop Rots.

Do not allow your laying hens to feed on barnyard filth—a hen is a natural scavenger and will take its pleasure in cleaning feed. The class of feed a hen eats reflects immediately on the interior quality of her eggs. Excessive green feed, stale, dirty drinking water, access to barnyard filth are a few of the common reasons why flocks produce eggs with very dark yolks. These eggs, no matter how fresh, will not grade higher than "B" grade.

REDLAND BOY FATALLY INJURED WHEN RUN OVER

Three-Year-Old Ross Kenny Dies on Way to Hospital

While playing in the yard of a neighbour, Fred Gouin, three-year-old Ross Owen Kenny, son of Mr. and Mrs. Owen Kenny of Redland, Alta., was fatally injured when run over by a truck driven by Mr. Gouin on Saturday morning.

Young Kenny was playing in Mr. Gouin's yard at the time of the accident and apparently did not see Mr. Gouin backing his truck out, and ran into its path. He suffered a fractured skull and was immediately rushed to Strathmore, but died before he arrived.

ANNUAL BAZAAR OF ST. RITA'S CHURCH, ROCKFORD, WILL BE HELD NOV. 9

The annual bazaar of St. Rita's Church, Rockford, will be held on November 9, at the Rockford High School. The preparations are now being made for the event.

A drawing will be held in conjunction with the bazaar and twelve prizes will be given, as follows:

Silver Casket, Satin Bed Spread, Box of 100 Cigars, Gentlemen's Two-tone Sweater, Ladies' Leather Hand Bag, Ten Gallon North Star Gasoline, One Cwt. Fur, Water Pot, Bacon, Floor Mat, Pyrex Tea Set, \$5 in Cash.

ODDS AND ENDS

The United Kingdom will require to import 250,000 tons of wheat during the 1938-39 crop year and 22 million bushels of flour. The bulk of this will come from Canada, the United States department of agriculture believes. "Not only because British buyers have a preference for Canadian wheat, but because of the large surplus in that country."

Last year's imports were 181 million bushels of wheat and 21 million bushels of wheat in the form of flour.

The Italian wheat crop is placed at 1,500 million bushels of wheat, an estimate. This figure is regarded as exaggerated and probably 250 million bushels. The domestic needs of Italy are around 300 million bushels.

MANY MOTORISTS ARE "BLIND" AT NIGHT

Fully ten per cent of automobile drivers are subject to "night blindness" and many of them don't know it.

This statement was made at a recent convention of medical men, held at Ottawa. The authority for the statement was Dr. Dyse Forget, of Warren, Rhode Island.

Dr. Forget declared that if people who are subject to "night blindness" drive at night without realizing their affliction, they are a menace both to themselves and to others. The need is a sudden failure of vision which comes on with the approach of darkness.

While the majority of accidents resulted from badly lighted streets, fatigue and inattention also were his factors. Dr. Forget maintained that many pedestrians were killed by automobiles because their vision was too poor to make a correct estimate of distance.

"Automobile drivers should always exercise care in approaching pedestrians if the destination appears to be looking at the vehicle, it is possible he falls properly to estimate the distance," he said.

JUST SILLY TALK

"Actually there is a great deal of silly talk underlying much of this talk about taxpayers 'working for the Government.' Taxes—what are they? Simply, they are amounts of money which we turn over to the Government to meet the costs of services which the Government renders to us—and which we demand that it render. That is all. Taxes, in short, are what we pay for a civilized community; for progress; for the comforts and necessities and amenities of life. For a greater human dignity. There are no taxes in the jungle."

"We could all of us avoid taxes, avoid 'working for the Government' if we wanted to. We could do it simply by insisting that the Government close all our post offices, abandon all our canals and waterways, cease taking care of our ports and harbours, abolish all aids to navigation, scrap all public buildings, stop building and maintaining highways, cut off all old age and war pensions, abolish our land, sea and air defenses, fire all our civil servants, repudiate the loans on our debt. These things done, there would be no taxes. We could then 'work for ourselves.'—The Ottawa Journal.

ADVERTISING CAMPAIGN

Commencing in this issue The Calgary Daily Herald is running one of a series of advertisements to convey to the people the part the newspaper is playing in the development of the country. Each week for the next six weeks The Herald will have a message for our readers and we ask you now to turn to the back page and read this week's advertisement.

THE WORLD OF WHEAT REVIEWED WEEKLY BY MAJOR H.G.L. STRANGE

"Where can I obtain a large quantity of reasonably good seed of the variety I want? I cannot afford to buy Registered or Certified seed for the two or three hundred acres that I shall sow."

I am receiving many queries like this from farmers who desire to sow a new variety over their whole farm.

My advice to those who require a large quantity of good seed and good quality, is that they should enquire from their Elevator Agent for the names of their neighbors who sample graded "A" this summer in the "Crop Testing Plan" plots.

"Crop Testing Plan" plots. "A" stock is true-to-variety to a good standard of excellence, and passing the test of "A" is becoming more and more recognized as a mark of good seed; moreover, farmers who have stocks in their hands which graded "A" are usually willing to sell to their neighbors for a small premium.

This year's "Crop Testing Plan" work revealed about ten thousand farmers in the West who had "A" stocks of Thatcher, Renown, Apex, Red Bobs, Cornet, Renard or the University.

Such "A" men, by selling to their neighbors, are certainly helping to improve the welfare of their fellow farmers.

Following factors have tended to raise prices: Germany desires discontinuance necessity of corn mixing with wheat flour. Unfavourable reports about German potato crop. Decrease in wheat crops harvested in China, Manchuria and Japan. British insufficient for ploughing and seeding in Russia and the Balkans. High ocean freight rates. Indian wheat shortage.

Following factors have tended to lower prices: British pound continues to weaken. Rumania sells wheat to Greece. Belgium again increases import duty on wheat. Denmark prohibits imports of wheat and rye. Heavy duty on imports of wheat into Switzerland. Italy has large wheat and barley crops.

Production Stage Reached In Gold Mining Activities In Northwest Territories

Gold mining activities in the Canadian Northwest Territories have now reached the production stage, with the commencement of milling operations on the Consolidated Mining and Smelting Company's "Con" property in the Yellowknife area. The first gold brick, weighing 735 pounds, was poured on September 5, and marked the start of actual gold production after more than three years of development and exploration work. According to the Mining Recorder of the Department of Mines and Resources, stationed at Fort Smith, N.W.T., the Yellowknife-Gordon Lake district continues to be the centre of great activity with several well-organized companies carrying out development work and numerous prospecting parties engaged in field work. Negus Mines Limited are erecting a mill on their property located a short distance from the "Con" mine, and Ora Plata, Chan Yellowknife, and others are actively engaged in the development of prospects in the same general vicinity. Approximately 4,000 claims have been staked in this region.

In the Great Bear Lake area, Eldorado Gold Mines Limited are treating about 80 tons of ore a day from which three to four grams of radium a month, as well as considerable amounts of silver and uranium products are being obtained. The high grade pitchblende reported in areas to the north and east of Yellowknife, is shipped to the company's refinery at Port Hope, Ontario, for refining, while the uranium concentrates are shipped to an American smelter. Recent improvements at the Eldorado mine include the extension of the power-house to provide for two additional 200 horsepower Diesel electric units, and the erection of a 70,000-gallon tank for oil storage. At the pitchblende-silver property of the Bear Exploration and Radium Company about 25 men are employed on surface work, general maintenance and freighting. During the month of August the mill at this mine operated 24 hours a day.

Prospecting and exploratory parties are continuing field work with several promising finds reported in areas to the north and east of Yellowknife. Many claims have been staked during the past few months as a result of new discoveries at Murray Lake, Macdonald Lake, Penzance Lake, Thompson Lake, Burnside Lake, Beaulieu River and Sunset Lake.

Altogether a total of some 45 mining and exploration companies and syndicates are participating in the development of properties in the Great Slave-Great Bear Lake mining field. Listed among these are Eldorado Gold Mines, Consolidated Mining and Smelting Co., Canadian Corporation of Canada, Dume Mines Limited, Anglo-Huronian Ltd., Ventures Limited, International Mining Corporation, and several other well-known Canadian mining enterprises.

Officials of the Department of Mines and Resources just back from a tour of inspection of schools, hospitals, government buildings and mining districts in the Northwest Territories while enthusiastic about the development which has taken place during the winter construction and other outside work will be ended for this year. Men already under contract for the development of the area scheduled to proceed through the winter on widely separated properties will remain in the North, but many prospectors, miners and construction workers will soon return south to await the resumption of field activities next summer.

Set Bad Example

Says Introduction Of Guns By White Men Caused Indian Troubles

The Indians never bothered much about large-scale massacres until they learned to handle white men's guns. Prof. T. F. McIlraith said in a lecture to school teachers in the Royal Ontario Museum at Toronto. The professor, an expert on Indian life, said it was "hardly fair" to blame the Indians for being warlike when actually he only learned the art after copying the white man and arming himself with the white man's guns.

The Indians believed the soul left the body through the mouth and that an Indian who died of strangulation would be cut off forever from the happy hunting grounds.

The First Saxophone

Man Who Brought It To Canada Wishes He Hadn't

Swing orchestras and jam sessions just don't seem to fit in with memories of concerts at the start of the present century, which may explain why the man who brought the first saxophone to Canada wishes he hadn't. Edmund Hardy is nearing his 81st birthday now. He has retired from orchestra work, and lives quietly in his suburban Montreal South home. "If I had known what they were going to do with it, I would never have introduced the saxophone to Canada," he avers with a bit of a shudder.

For 50 years after he had founded it, Hardy led the music in Montreal, a band that performed at all kinds of important functions not only in Quebec, but throughout eastern Canada and the United States. His bulky scrapbook is a chronology of social events from the half-century from 1871 onward.

He made his last appearance as a band leader five years ago when he led 180 musicians in his own band, and the bands of the Grenadier Guards, Victoria Rifles, Black Watch, Royal Canadian Regiment, and the Fusiliers de Montreal, at the funeral of Calixa Lavallée, composer of "O Canada".

To get back to that first saxophone: Hardy had it made to his order in France and brought it back to Canada. He was conducting a music business in Montreal at the time, and sold the instrument a month later. He supposed he was selling it to a man named J. C. Kirkwood, in Markham. I willingly do so, because it is a common grievance, namely: "I was introducing a friend named his name. Now, most of us want to hear clearly the name of the person introduced, and likewise the man introduced wants his name articulated clearly."

But he still wishes he hadn't.

Probably Means More

Husbands Warned Against Cooking Meat On Week

Possibly some husbands missed a recent news item stating that New York University is about to open a cooking course for men only. The conductor of that course, Miss Gladys Curry has for her slogan: "Every husband should cook meat at least once a week."

"At least once a week" may be all right, but it would be better before this meat Monday, Wednesday and Thursday? Miss Curry's approach is diplomatic, but kind words butter no parsnips. She says that men have a "more scientific mind," more "natural mechanical ability," and that they can cook a palatable meal from a simple recipe. Yes, indeed. And possibly they can. But the dishes better and scrub the floors more neatly.

Husbands who know their rights will be on guard. If a man wants to be a chef, let him. All the best cooks are men, anyway. It is not right that a wife should say to her husband: "You're a man, so you ought to be able to make the kind of bread that Father used to make."—New York Times.

Much Too Much

Cost For Government In Canada Runs Into Many Millions

Canada lays on the line no less than \$122,000,000 in salaries for Dominion employees and pensions, \$77,000,000 in salaries and \$45,000,000 in drawings. There are 65,000 people drawing down the money, 43,000 distributed throughout the country. The figures come from the deputy minister of finance. On top of this federal outlay, there are the provincial and municipal expenditures, all in the name of government. It is much too much.—St. Catharines Standard.

Correct Measurements

Dr. Puffat, a prominent dentist in the west, received a letter the other day from a man in the next county which said: "I've heard tell of your skill as a dentist, and I would like some of your teeth. As I am busy with my spring work I will give you the measurements. My mouth is three inches wide across five-eighths of an inch throw the jaw, and some hummocky on the edges. Jaw is shaped like a house, with the top forward. If you want me to be more particular, I will have to come there."

Large Hangar For Toronto

John Schofield, chief architect of the Trans-Canada Air line, announced construction of a \$125,000 hangar for the air line at Malton, Ontario, would start at once and be completed by Jan. 1.

ROYAL FAMILY AT FAMOUS SCOTCH MEET

The King and Queen with the two little Princesses in the Royal box watching the athletic events at the famous Broomiegarth.

A Common Grievance

People Object To Hit Introduction And Mumbled Names

At C. N. E. Press Day, I met a man who has a grievance, and he wanted me to voice it on this page. Says J. C. Kirkwood, in Markham. I willingly do so, because it is a common grievance, namely: "I was introducing a friend named his name. Now, most of us want to hear clearly the name of the person introduced, and likewise the man introduced wants his name articulated clearly."

Once I heard a 90-year old man dodge his obligation quite nicely. He was on the staff of Belfast City Hall. At a reception given by the Lord Mayor this ancient gentleman was supposed to introduce all arriving guests to the Lord Mayor. His way of doing his job was to turn to the guest, and say: "This is the Lord Mayor" and the Lord Mayor shook hands with several hundred unnamed persons. This same way of making introductions is used by a good many persons only 50 years in point of age.

Created His Own Job

Young Man Makes And Sells Transparent Covers For Books

A young man, alert to possibilities for earning extra money, has been successful in making and selling transparent covers for books and magazines. He uses a cellulose material which is inexpensive; cuts the covers to fit standard-size books and magazines, as well as the small, digest size, and binds the edges with heavy fibre tape, which makes the covers long-wearing. These covers protect the books and magazines from dirt, soil, wear, weather, etc., and he sells many to libraries and bookshops, as well as from door to door. He has found something which meets his own needs as well as the needs of his customers.

Pangs of the rattlesnake lie backward until the mouth is opened.

Rug Made Of Easy Crocheted Strip

Here's a new wrinkle in the art of rug-making. A rug made in a continuous length—just three ends caught through with a crochet hook—the strips then sewn together. The result is a rich design—a luxurious pile. Use candlewick, rag or yarn. Pattern 6166 contains instructions and charts for making rug, illustrations of 1 of and of stitches; materials needed; color chart. To obtain this pattern, send 20 cents in coin (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

Farm Of The Future May Be Called Upon To Produce Many Things Besides Food

Uniforms For Reporters

Frederick T. Birchall Describes Uniforms In The New York Times

Even German newspaper reporters wear uniforms, and it is a matter of brown shirt and tunic, black trousers and brown peaked cap, making the stout ones look like Sturm Troopers gone to seed, while the little ones resemble under-developed Boy Scouts proud of diligence to the dignity of "long pants".

The Italian correspondents all wear Fascist uniforms when they must. They contrive to escape some into the freedom of civil garb. Only the foreign correspondents from free countries retain liberty in the matter of attire, and they are tiny islets in the Brown and Black sea.

The plight of their less fortunate brethren has produced among the British, French and American a reaction toward plowboys, stout hats or no hat at all.

Being hatless, even if not lacking nature's head covering, has its advantages because one does not have to watch out for the endless passing flag; there has nothing to remove. It is a great timesaver because the banner party of the procession is not content for a block or two.

All German diplomats are in uniform day and night. Theirs is black with red buttons and with alternating stripes down the trousers. High boots seen optional.

The dress uniform for evening, however, is a stupendous affair, with tails, wide silver stripes, silver cord fetters from chest to shoulder and a profusion of silver foliage—apparently fringed, since it corresponds to nothing in this climate—on the collar and lapels. Obviously all this is worn a long cloak with a silver spread-eagle below the shoulder.

Thus, although the German diplomat may seem a mere blood brother to an admiral in the daytime, after dinner no ball porter in any fashionable hotel anywhere is more respectfully caparisoned.

Youth Training Program

Fifty Thousand Canadians Have Been Trained By The Plan

With particular emphasis on placement features, the Dominion provincial youth training program for the present fiscal year is making excellent progress, the federal labor department statement said.

"While it is naturally too early to determine with accuracy the number of jobless Canadians who have been trained by the plan this year it is probable that last year's figures will be equalled if not exceeded," the department statement said. "The program of the provinces have placed figures by the program. The exact figures are: Men, 32,301; women, 23,197. Total of 55,497. Last year the amount voted by parliament was \$1,000,000. This year the Dominion's contribution is in the neighborhood of \$1,500,000. Provinces contribute on a 50-50 basis to the expenditure."

Thrasher Wheat

New-Test-Resistant Wheat Makes A Good Showing This Year

Thrasher wheat in Western Canada suffered from rust last year but "stood up first rate" as far as the new-Test-resistant wheat was concerned, Dr. L. H. Newman, Dominion cerealist, said.

Scientists have known for some time that Thrasher was susceptible to leaf rust and this year it came early and bad. Newman said that there was leaf rust damage to Thrasher's Manitoba particularly but even the damaged stands did infinitely better than the ordinary non-resistant varieties.

Dr. Newman stated that Thrasher generally had made a good showing in Canada and experiments were continuing to eliminate the leaf rust.

When we see a meteorite, that appears to strike the earth, we know we must be at least 200 miles away, since it disappeared below our horizon while still high enough in the air to appear luminous.

Interviewer: "What have you to say about anonymous letters?" Professor: "They're stupid. I read them but I never answer them."

England has a movement for abolishing dog licenses and taxing bicycles instead.

A recent news item gives Mr. J. W. Potts of Montreal credit for saying that there are 3,500,000 milking cows in Canada and that there are 315,000 farmers engaged in this branch of agricultural activity. He also stressed the growing importance of the industry for supplying, in addition to the dairy products so well known, the raw material (casein) for synthetic wool. It is stated that there is a thriving industry for the manufacture of synthetic wool from casein and that it is bound to grow in other countries. The production at the present time is about 25,000 pounds a day.

On this side of the Atlantic we have not been slow to make so much use of synthetic products to replace declining supplies of natural products but it is safe to say that there will be more as time goes on. Milk powder, casein, many vegetable oils, soy beans, wool, straw and cornstarch and many other vegetable products are being produced and the materials for the manufacture of many useful articles of commerce. There is a lesson to be learned from the modern motor car to indicate that soy beans have any connection with machinery, yet they are producing thousands of them annually in the development of automobiles.

The farm of the future may produce many things besides food. As the natural resources of the lands are dissipated, we shall have to turn to the synthetic products to supply the materials to provide clothing, shelter, motive power and countless other necessities. Present estimates of the world's resources of oil indicate that the next quarter century will see them pretty well up.

Experiments have already shown that good motor fuel can be produced from materials easily grown.

Farms and factories are very important factors in the well-being of the nations of the world. It is also indicated that this tendency will increase rather than decrease so it behooves the farmers to view their profession with this in mind. Present tendencies of so many to disregard the effect of individual action upon the whole industry are to be lamented, especially when individual action destroys confidence in the products of the industry. Farmers to-day are somewhat at the mercy of better organized interests in that they have more power than they have in the vital points concerning their business. The importance of farm products in the general economy of the world is reflected in the figures of trade and commerce, but the importance of the farmer is reflected in his own situation. It is to be hoped that New uses will continually be found for farm products and producers will be able to meet the demands of their warms but whatever happens the collective relationship of the various members of the industry should not be lost sight of. If new branches of the farm industry are being developed, why not give them the kind of consideration that will insure rightful recognition. Should not farmers' organizations be prime movers in the development of new developments in the uses of their products?

Relics In Australia

Discover Evidence Of A Former Higher Culture Than The Aborigines

Relics thought to be a link with a former race in Australia, of a higher culture than the aborigines, are being discovered in Queensland.

E. W. P. Chinnery, anthropologist with the northern territory survey party, has received evidence of the discovery in the shape of potsherds and mortars, and has discovered in Queensland.

"If the relics are identical with those discovered in other places they may prove an important link with the supposed movements of early migrants between Asia and the Pacific, and indicate a new line for further research into anthropological phenomena in Australia."

In New Guinea there are circles of standing stones, all of which are due to a great culture of the past. In some places a number of the stones which were unknown to the natives, are used as mirrors.

Turkey has abolished its consumption tax on medicine.

Over 100 in this group and they were nearly all born in Canada or the British Isles. From Manitoba 58, Saskatchewan 24, Ontario seven, Quebec five, New Brunswick and British Columbia one each, and seven from England, one each from Ireland and Scotland, the U.S.A. seven, and only 11 from all Europe. There are about 1,800 employees all told at Flin Flon.

MINERS OF THE DAY SHIFT AT FLIN FLON, MANITOBA
All in their working kits, with rubber coats, pants and heavy knee-length boots. On their heads the protecting helmet made of a light tough material and from their belt acetylene lamps. One hundred and fifty men in this group and between this and the night shift they get out about 4,500 tons of ore daily at Flin Flon.

—Photo by Butcher & Rummals, Regina and Flin Flon.

NIGHT SHIFT MINERS AT FLIN FLON, MANITOBA
There are 87 men in this group—too many to name individually, but it is interesting to note that 18 are from Manitoba, nine Saskatchewan, three Alberta, four Ontario, two Quebec, five England, four Scotland, two Ireland, and the balance from Poland, Czechoslovakia, Yugoslavia, Austria, Serbia, Roumania, Hungary, Lithuania, France, Sweden, Finland and only one from U.S.A. It takes all kinds of men to make a mine!

WORLD HAPPENINGS BRIEFLY TOLD

Horatio Walker, distinguished Canadian painter and native of L'Anse-au-Loup, Quebec, He was 80.

Plans for a mass migration of 750 Monacanites from Mexico to Canada apparently have been abandoned, according to immigration department officials at Ottawa.

H.M.C.S. Nootka sailed into the water at Victoria, alongside the Esquimaux plant of Yarrows, Limited, and was fourth Canadian naval vessel to be launched this year.

Approximately 50,000,000 feet of Maine timberland left before the onslaught of the recent hurricane.

Forestry Commissioner Waldo N. Beaverville estimated.

Continued increase in savings accounts and an increase in deposits with the Bank of Canada featured the Aug. 31 report of chartered banks to the finance department.

More emphasis on youth programs was urged before the general council of the United Church of Canada by Judge P. A. E. Hamilton of the Winnipeg juvenile court.

Drilling of a deep-test well in the Lloydminster gas and oil field will be started shortly, it was announced. The well will be drilled by a concern to be known as "Lloydminster Royalties."

A gold medal presented to John Bright, British reformer, by the Birmingham Liberal Association in 1853 is missing from its case in Rochdale Art Gallery, the book having been forced and a gift replica left as substitute for the gold.

A German Name
Local candidates seem not to be aware whether the word "Sudetens" is German or not. Irrespective of its origin, however, says the Toronto Star, it is (Lippincott's Gazetteer) the German name for the Sudetic mountains, and hence transferred to their inhabitants. The Sudetes range, or Sudetes, were known to the ancients as the Sudeti Montes.

Money is no homing pigeon; when it flies away it doesn't come back to roost.

Information For The Future

Scientists To Leave Instructions In 800-Pound Metal Letter

Five thousand years from now historians will receive an 800-pound metal letter, a "time capsule" containing information about the present age. It will be deposited 50 feet below the surface of the New York World's Fair grounds. And if future historians find the capsule, major credit will go to a Canadian geophysicist, Sherwin Kelly, former professor of geology and mineralogy at the University of Toronto.

Mr. Kelly, an expert in electrical prospecting, will direct future historians to the cache of the capsule in a book of record which will be preserved in libraries, museums and depositories throughout the world. The message in the book of record will tell how the capsule can be located, using present-day electrical prospecting methods.

The "time capsule" will also contain statements of this age's scientists, engineering, industrial, social, religious and philosophical achievements. Motion pictures will show how we look, act, talk, and what hats the ladies wear.

Reflects Public Opinion

No Government Can Change Unless Majority Of People Do

Government reflects public opinion. If you want a different kind of government, you must change public opinion. The individuals who make up governments—local, state and national, know a great deal about public opinion because that is the most potent force in their careers, and over a period of time they become past masters in forming public opinion, first, because they have barometers in very frequent elections, and second, the very offices with which the people endow them give them standing in the court of public opinion. Public Relations, New York.

Wheat feed, or to be fed, to livestock and poultry in Canada during the 1937-38 crop season has been estimated preliminary as 18,926,000 bushels, as compared with 15,789,000 bushels in the 1936-37 season.

Time flies, so don't put quicksand in the hour-glass.

Good Little Chinese

Children In New York's Chinatown Never Get Into Trouble

It has taken the New York authorities concerned some years to enlighten others regarding the exemplary conduct of local Chinese children. However the information is no less interesting than it would have been if supplied earlier.

The organization which revealed to the world the unusually fine innate qualities of the little Chinese bears the slightly cumbersome title of the Joint Legislative Committee on Children's Court Jurisdiction and Juvenile Delinquency. The J.L.C.C.-J.D.D. is authority for the statement that among the 3,000 children in New York's Chinatown there has been only one case of juvenile delinquency in the past eight years.

The investigators went further and asked Chinese parents to what they attributed this record. The answer was as follows: 1. Among the young the most severe punishment is to "lose face". 2. The child is taught reverence for his parents.

To-day more rice is eaten in the world than any other food.

No Puzzle For Him

Schoolboy Had Brains To Think He Knows Inspectors Age

An inspector of schools, determined to puzzle a class of boys, asked them this question in mental arithmetic: "If I had a field 100 yards long by 80 yards wide, and I employed three men for five days to plant it with seed potatoes at a guinea a hundredweight, how old am I?" The class was not unimpairedly baffled, all except one boy who immediately raised his hand.

"Well," asked the inspector slightly taken aback to find his challenge accepted.

"Forty-four," said the boy.

"How do you make that out?" demanded the inspector.

"Well," said the boy, "I have a brother who is 22 and he's half-dad."

Sir Walter Raleigh grew Ireland's very first potato in a garden, still in existence, located at Youghal, 30 miles from Cork.

Adelina Pattil, often referred to as the highest paid prima donna on the operatic stage, earned \$5,000,000 in her lifetime.

FAMOUS FRENCH BOXER IN NEW ROLE

Georges Carpentier, foremost in the ranks of contenders for the world's heavyweight pugilist honors of yesterday, shown at Stoke Poges, England, with his daughter, Miss Jacqueline, who competed in the Girls' Open Golf Championship. "Gorgeous Georges" is still as dapper as in his fighting days.

SUNDAY SCHOOL LESSON

OCTOBER 9
SPIRITUAL WORSHIP

Golden text: God is a Spirit; and they that worship him must worship in spirit and truth. John 4:24.
Lesson: Exodus 20:4-6. 32:18.
Devotional reading: Psalm 100.

Explanations And Comments

The Second Commandment: Worship God Spiritually. Exodus 20:4-6. The second commandment forbids image worship, the making as an object of worship of any graven image or likeness of anything that is in heaven above, or that is in the earth beneath, or that is in the water under the earth. The earth was thought of as flat and resting upon a huge abyss of water. Fish were worshipped in Assyria, Ammon, and Egypt. God must not be worshipped under false forms.

Thou shalt not bow down thyself unto them, nor serve them: for I, Jehovah thy God, am a jealous God—jealous of my honor, of the use of images which turn the worshipper's mind away from me while they represent me. Visiting the iniquity of the fathers upon the children, upon the third and upon the fourth generation of them that hate me. Proof of this inheritance is only too common in the craving for alcoholic drink inherited by descendants of drunkards in the degenerated and feeble-minded who are the children of drinkers, and in the wretched life which sometimes befall even the children of moderate drinkers. "And showing lovingkindness unto thousands of them that love me and keep my commandments." The marginal rendering of the Bible in "thousands of generations." Figure of speech which shows how infinitely greater is divine mercy than divine wrath.

No one can live without an object of worship. If we do not worship the true God, we worship something in his place. Somewhere in our hearts there is a shrine that we have made our own. "Christian idolatry" is less crude than heathen idolatry, but it is essentially the same—God is de-throned, some object is put in his right place.

"The hour cometh and now is." Jesus continued, "when the worshippers shall worship the Father in spirit and truth: for such doth the Father seek to be his worshippers."

Rouget de Laule, French royalist, wrote the "Marseillaise," only to hear it as the battle hymn of the opposing revolutionist army.

Three astronomers at Yerkes Observatory, at Williams Bay, Wis., have discovered a star 3,000 times larger in diameter than our sun.

This Fog Was Costly

Tied Up Litter Queen Mary For 12 Hours At New York

The New York Post says no fog was dense enough to subdue the glitter that tied up the Queen Mary for 12 hours recently on the very entrance to New York. She was bright with the gleam of gold and silver in the amount of \$45,152,000; \$45,000,000 was in gold, \$152,000 was in silver.

If there is any question in your mind that the fog doesn't run into money, consider that the Cunard White Star Line had to pay overtime to the customs inspectors and that the extra food bill, according to Chief Steward E. B. Flumby, amounted to \$4,000!

The liner did not expect to serve breakfast as the Queen Mary was scheduled to dock so early; so first breakfast had to be served; then the boat was really trapped and luncheon was served and before the fog and tide came to terms, dinner was served.

All in all, 2,000 meals were served instead of 60.

"In China a man doesn't know his wife until he has married her." "Why mention China particularly?"

If a battery is fully charged there is no danger of its freezing.

MUSSOLINI SAID TO HAVE BEEN FACTORY IN PEACE

Munich.—Premier Mussolini was credited in inner conference circles with having weighed the balance to ward peace in an 82-minute visit with Hitler just before the four-power conversations opened.

The two met at Kuperstein, on the former Austro-German border, and came on to Munich together by train. They had full opportunity to talk things over before their meeting with Chamberlain and Daladier.

On the train ride, Mussolini was said to have stressed the necessity of reaching an agreement with France and Britain. This was said to have paved the way for a quick accord of all four statesmen.

That Mussolini should seek to restrain Hitler after his own series of speeches in northern Italy during the past two weeks came as a surprise to some. But the speech-making tour Di Duce had accomplished and reassured that Czechoslovakia should be chopped up.

This explanation was offered in informal quarters:

At first Mussolini did not believe Hitler was in earnest in his threat to invade Czechoslovakia. Di Duce was under the impression when he made his speeches in northern Italy.

Neither did the Italian premier believe that France and Britain would fight. Even after the Berchtesgaden conference between Hitler and Mr. Chamberlain Di Duce had continued to treat democracies as "cowards".

But within 24 hours before the Munich meeting was called Mussolini was said to have been convinced that Britain and France really would fight if Czechoslovakia were invaded.

The French had started progressive mobilization and Britain had mobilized her navy. "Then, Di Duce was ready to accept Mr. Chamberlain's proposal of intervention at Berlin when it was made by the Earl of Perth in Rome. This proposal was said to have been that Mussolini back up the idea of a four-power get-together.

A prominent Nazi editor said the conference marked a change of Hitler's attitude toward democracy. This source said the change had been found in Mr. Chamberlain and Premier Daladier two men whom he did not but respect.

Mr. Chamberlain's services already had won a public tribute from Hitler in his Sportplatz speech in Berlin. But, the editor said, Hitler did not have the measure of the French premier until Thursday.

The Fuehrer was reported to have labelled the stocky Frenchman "ein ganzer kerl" (a real he-man). The German delegation was thoroughly convinced Daladier was one of the most determined champions of peaceful settlement.

Many Poles Killed

Border Incidents Said To Have Caused Death Of 70

Warsaw.—Official Polish figures placed at 70 the number of Poles killed in incidents on the Polish-Czechoslovak border during the recent tension.

The newspaper, Wzrost Warsaw, alleged a number of deaths were caused by electrified wires strung along the frontier by the Czechoslovaks.

Reports of new frontier incidents asserted shootings occurred, for the most part, at night when Poles attempted to pass from Czechoslovakia into Poland.

The government continued to avoid a Czechoslovak note answering a Polish note which contained detailed proposals for territorial revision of Tescey and Bliska to settle the Polish minority question.

New Candidates

Montreal.—Chief Clerk D. Robitaille of the naturalization court said his staff had to be augmented to handle the rush of German, Czechoslovak, Hungarian, Austrian and Italian applicants for Canadian citizenship. Applications have increased 50 per cent, he said, as foreigners sought to swear allegiance to the British Empire to escape conscription calls from their home lands.

Mobilize Chemists

Ottawa.—Canadian council for the Society of Chemical Industry appointed a two-man committee to confer with chemical organizations in Canada for the mobilization and utilization of chemists for national emergency. Victor G. Bartrum and Dr. J. C. Phillips, both of Montreal, comprise the committee.

Bren Gun Probe

Competence Of Department To Pass Upon Commercial Contract

Ottawa.—Competence of national defence department officials to pass upon economic and business aspects of a large commercial contract is one question Mr. Justice H. H. Davis will consider in preparing his report on the new Bren gun contract.

The judge, royal commissioner investigating the contract under which the John Inglis Company, of Toronto, is to make 7,000 Bren light machine guns for the department on a cost plus 10 per cent basis, indicated recently.

He was commenting on questions addressed to Lieut. M. P. Jolley, small arms expert of the department, by Lieut.-Col. George Drew, who provoked the inquiry by criticizing the contract in a magazine article.

Col. Drew had asked Lieut. Jolley if a recommendation contained in a departmental report he had helped prepare to the effect that 10 per cent profit on machinery installed in the Inglis plant be eliminated had been followed. The answer was "no."

"Have you read the contract?" asked Col. Drew.

At this the commissioner halted the questioning, saying undoubtedly the witness believed the profit had been eliminated and Col. Drew believed it had not. That was the matter for argument and interpretation.

"It is essentially a business proposition," the commissioner said, "and one I will have to deal with in any event, whether this man (Jolley) had any competence to pass on a business proposition."

Col. Drew wanted to know if any part of the gun could not be made following Czechoslovak and American methods and suggested some delicate parts of the gun were farmed out to parts manufacturers.

Witnesses believed the thought, such firms could make the parts provided they had the equipment and had opportunity to inspect the work. In any event, whether this man (Jolley) had any competence to pass on a business proposition."

Crude Petroleum

Production In Canada Reaches New High During July

Ottawa.—Crude petroleum and natural gasoline production in Canada during July advanced to a new high monthly record of 693,332 barrels from the preceding month's output of 537,654 barrels and the July, 1937, total of 244,931 barrels, according to the Dominion Bureau of Statistics.

Production during the first seven months of 1938 totalled 3,612,757 barrels compared with 3,507,544 barrels in the corresponding period of 1937.

Alberta's output in July of 678,243 barrels included 673,810 barrels from the Turner valley field.

Exports of petroleum and its products from Canada in July were valued at \$110,629, or 25 per cent, below the value of the previous month's exports.

Transfer To Halifax

Royal Air Force At Trenton May Be Sent To East Coast

Trenton, Ont.—It was reported that officers and crew of the torpedo bombing squadron of the Royal Canadian Air Force station here expect to be transferred to a new station in the Maritime Provinces.

Confirmation of such a transfer was not available.

The squadron is composed of 80 officers and men with six aeroplanes of heavy type. The machines are equipped with two machine guns with torpedoes for releasing bombs.

It was stated unofficially that leavees have been cancelled at the R.C.A.F. station here.

DOCTOR MANION TO SEEK SEAT IN LONDON RIDING

Ottawa.—Hon. Dr. Robert J. Manion, Conservative leader, said he was willing to seek a seat in the House of Commons at the London, Ont., federal by-election next Nov. 4.

He issued a statement which said: "I have advised the National Conservative Association of London of my willingness to allow my name to be presented to the convention, shortly to be called to choose a National Conservative candidate. I feel deeply honored that the Conservative association in the splendid riding of London should seek me as their candidate and I assure them of my constant desire to accept them and Canada."

At the same time, I should like to express my appreciation of the kindness of the Conservative Association of Brandon and Waterloo South, both of which offered me nominations."

Referring to Prime Minister MacKenzie King's announcement following the cabinet session that he would like to see Dr. Manion unopposed in London, the Conservative leader said:

"I wish to express my warm appreciation of the prime minister's interest in indicating the government's desire that I should not be opposed in the by-election in London. Such an action is a very happy expression of the amenities of public life in Canada."

Inspector for the Poultry Division

Dominion Bureau of Statistics Reports Increase in Employment

Ottawa.—Employment at Sept. 1 showed a decidedly upward movement, the expansion exceeding that indicated at Sept. 1 in any previous year of record, the Dominion Bureau of statistics reported.

All provinces except New Brunswick shared in the improvement, but the recovery in manufacturing in Ontario and that of a more general character in the prairie provinces increased the Czechoslovak factor in the situation, the bureau said.

The bureau says unusually pronounced expansion was shown in manufacturing, more than 12,000 persons being added to payrolls, largest gain ever recorded in early autumn. The usual gain at Sept. 1 is slight.

Greatest improvement in factory employment was in food, textiles, iron and steel, that in iron and steel being contra-seasonal. Mining, transportation, construction and maintenance services and wholesale trade showed healthy activity.

Practic provinces reported an increase in industrial employment and total increase of factory employment was reported because of the favorable agricultural situation. Gains were shown in manufacturing, transportation and services, wholesale trade and construction and maintenance. Retail trade was slackener.

Nations Buy Up Food

Russia Only European Country Which Grows Enough For Needs

London.—European nations looked hungrily toward the Americas in a scramble to fill their cupboards for war and prevent the starvation that stalked the last conflict.

With the possible exception of Russia no major European nation grows enough to feed itself.

For the past two years the principal European source of food has been to store up for a rainy day. Great Britain is said to have enough food stocks, together with the production of the British Isles, to feed the country for one year without a single ship coming in.

Germany's bumper grain crop, including wheat and other bread grains, is expected to total well over 20,000,000 bushels. Field Marshal Hermann Goering, Nazi economic dictator, recently ordered hurried building of more granaries.

Proth meat is not very plentiful in the Nazi realm since farmers still are suffering effects of the pork rash which began three years ago. It was asserted, however, with 700,000 head of hogs and 220,000 head of beef on the farms, stored in refrigerators, and canned, Germany could face the future confidently.

Usually well informed sources said Italy has laid by only a comparatively small stock of food. Some purchases of wheat were believed made recently in Argentina. For her meat supply, Italy depends largely on Yugoslavia.

WHAT CZECHS STATE THEY ARE READY TO CONCEDE

London.—The text of the Czechoslovakian legation's statement on the concession Prague is willing to make follows:

"The Czechoslovak government announces that before the Munich conference, the Czechoslovak government accepted further concessions.

It is prepared to cede to Germany territory containing more than 50 per cent of German inhabitants and asks for their only frontiers of such a kind as to make a new Czechoslovak state capable of existence and defence.

The Czechoslovak government, however, cannot agree to a plebiscite under

Famous Pottery

Wedgwood Has Been Manufactured For Two Centuries

Two centuries ago Catherine the Great of Russia had a 601-piece set of Wedgwood pottery. Today Queen Elizabeth II. of England still enjoys her morning tea from Wedgwood. Added evidence that Josiah Wedgwood & Sons, Ltd., keeps pace with the time was in the recent laying of a cornerstone for a new hyper-electric, modern electric kiln outside Hanley, England.

Spode, Minton, Staffordshire may bring glazes to collectors' eyes, but none of England's famed pottery has quite so hoary or famed as past as Wedgwood. The first Josiah set up for himself in 1759, nine years later built a factory on 1,000 acres of land at Hanley. He became famous for his cream-colored earthenware called "Queen's Ware" for George III's Charlotte, was respected for improving turnip roads, founding schools and chapels, was hated for exposing the cause of the upstart American colonies. But by 1811 the Wedgwoods disposed of their plant until a five-acre plot on which the plant still stands was jostled by other pottery, making Josiah's neighbors' smoke marred the fine finished of glazed Wedgwood ware, snuffing shafts of a nearby coal mine made Wedgwood's plant sink two feet; Hanley's congestion, for which Critic Lewis Mumford damned the place as a "mud city," made Wedgwood expansion. So the firm bought a wooded 400-acre tract five miles outside. In 1825, Josiah planned a \$1,500,000 factory with electric ovens and a model town for 600 Wedgwood employees. And the one who cared to live there, including the new plant, Wedgwood's assets total some \$2,500,000. Profit is a secret, but dividends have been paid every year except 1929-33 since the company's founding.

Wedgwood now boasts seven active direct descendants of Josiah I. Family tradition has it that each generation has a "Colonel" job. Present Josiah are No. 6 ("Colonel" Job), who has been a Labor M.P. for 22 years and No. 7, who is managing director of the firm. No. 5 is sympathy for the American colonies has proved prophetic. Of the 2,000,000 pieces of pottery the Wedgwoods make and sell for about \$1,000,000 each year, over 50 per cent are sold in United States markets. Josiah, the favorite pattern is undecorated, embossed, cream-colored. So vital is the United States market that when the company's representative in Manhattan, Kenneth Laurence Wedgwood, was made chairman in 1920, he stayed eight weeks in the city. The only thing which takes Chairman Kenneth back to England is the annual stockholders' meeting. He is proud, to a family reunion since all stockholders are Wedgwoods. Time on rats.

A Priceless Discovery

World Made Vitamin Conscious By English Scientist

The fact that "vitamins" is now a household word is due entirely to Sir Frederick Gowland Hopkins, the eminent Cambridge biologist who has announced his forthcoming retirement, says News of the World. He studies being a "vitamin" because their existence had long been known. His great service to humanity was to establish their immense importance in ordinary diet, after a series of long and patient experiments on rats.

He made his experiments in a little cellar under his lodgings in Cambridge, and soon discovered that rats were fed on a scientifically pure diet, they died.

If a little milk was added they lived. From that discovery has sprung the whole science of modern dietetics, which has almost abolished rickets.

Canada And Jamaica

Flour, cornmeal, oats, wheat, ham, pickled pork, condensed milk, leaf tea, barbeque, and potatoes were the principal agricultural exports from Canada to Jamaica in 1927 when the total of all Canadian exports amounted to considerably more than four and a half million dollars. As in former years, Canada was the largest individual supplier to Jamaica of goods classed as food, drink, and tobacco.

Havana Club, has a huge tree that grows in real Porto-American soil. The earth around it was obtained from every country in the western hemisphere.

The tiny rainbird of South America leaps from the water, rests in the surface vegetation, and then darts in hours with half of its body exposed.

All the robins of the United States belong to one species.

Draw Tourist Trade

Completion Of East And West Highway Would Be Good Business

Here are two views on the value of the Trans-Canada Highway along the shore of Lake Superior.

George Gerbach, of Sault Ste. Marie, who has just returned from a tour along the north shore, calls it a great country.

"That shore road west of the Sault Ste. Marie," said Mr. Gerbach, "and when it is completed to the lakehead it should be a big thing for the tourist trade. It will bring a great many tourists."

W. E. S. Bryan, of Port William and a former resident of the Sault, takes another point.

The north shore road, said Mr. Bryan, would certainly mean a great deal to the tourist trade. But he also felt that the completion of the road was of great importance to Canadian unity.

"One of the difficulties in Canada at the present time," said Mr. Bryan, "is that the east knows very little of the west, and the west knows very little of the east. The west thinks it is unfairly treated and the east is up with it. The road will be the days of motor transport, and if there were a good road between the two coasts, the west would be able to travel over an all-Canadian highway and so bring back and west into closer relationship with each other, it would mean much for Canadian unity."

Mr. Bryan's view is one which governments should give full consideration, and that of Mr. Gerbach in the future, and the west knows very little of the east. The west thinks it is unfairly treated and the east is up with it. The road will be the days of motor transport, and if there were a good road between the two coasts, the west would be able to travel over an all-Canadian highway and so bring back and west into closer relationship with each other, it would mean much for Canadian unity."

Laughed At Wrong Time

Nova Scotians Take Pottery Seriously

According To Story

This story illustrates how seriously the Nova Scotians take their politics. When Sir John Thompson became prime minister of Canada in 1920, the Maritimes were proud that one of their sons was leading the Dominion government. He was, however, respected and popular personage. When Sir John dropped dead in Windsor Castle in 1924, just after an interview with Queen Victoria, there was genuine sorrow in Nova Scotia. But one young man laughed when he heard the news.

Five long years afterwards that young man was driving along a road in Nova Scotia when he saw a sign at the edge of a lake. It started to drift both horse and driver into the water after the man. He stayed right with the horse, and the horse and rider were saved. He held for help at the top of his voice.

While he was hollering and fighting to hold back his horse and sleigh, the sign came to rest against a man's back. Standing with his hands behind his back, the newcomer looked at his hapless victim and speaking slowly said:

"They tell me you laughed when Sir John died; well, — you laugh now."

Story From Real Life

How Oppenheim, The Famous English Novelist, Won His Wife

R. Phillips Oppenheim is just completing his 51st year. For many years past he has turned out two or three a year, by no means short stories and books of travel, an astonishing record for a man in his 73rd year.

Mr. Oppenheim is a Londoner, whose own hard-working life is in strong contrast with the gay, happy-go-lucky existence of so many of his characters. A story told about his marriage might have been taken from one of his own books.

He fell in love with the daughter of an American judge traveling in England. She loved him too, but her father told him bluntly to go away and improve his prospects. He wrote hard for a year and then, with a cheque for £1,000 in his pocket, set off for Boston, where the young lady lived.

When he reached the house it was early morning, and nobody was up. He went to the door to wait, and when he returned to England it was with his bride. They have one daughter, and live in Gurney manor of the year. News of the World, London.

The walking stick insect not only imitates a twig in shape, but color also. It gradually changes from green to brown as the green twigs take on the brown color of the summer.

Before a man laughs at the awkward way his wife parks the car, he should see himself serving a bullet on his shirt.

A centipede is a monument to massive insect discipline.

ECHOES OF THE SPANISH WAR

In view of the statement of Premier Negri of Government Spain before the League of Nations Assembly that all foreigners fighting for the Loyalist cause would immediately be withdrawn from the struggle, this picture is of unusual interest. It shows wounded Italian Legionaries who have been fighting on the rebel side in Spain, arriving at Naples where they were given a civic reception.

Has Accomplished Much

Iranians Have Reason To Be Proud

On the occasion of the sixtieth birthday recently of the Shah of Iran, all Iranians took a holiday to celebrate. After all, says the London Daily Sketch, they have something to celebrate. In just over ten years they have completed the Trans-Iranian railway at a cost of more than £40,000,000, and has provided for the most important railway stock to run where there used to be nothing but mule tracks. He has also disbanded the powerful tribes with his modern army, and last year signed the Four Power Non-aggression Pact with his Moslem neighbors of Turkey, Afghanistan and Iraq. His palace of Saad-Abad is a lovely piece of architecture and workmanship, nesting against a background of the Alhambra mountains.

The main building is patterned with delicately colored tiles, and vast balconies and fountains abound.

Getting Together

Saskatchewan Joins International

First On Grasshopper Plague

War move toward a co-ordinated attack on grasshoppers by the state of North Dakota and the Province of Saskatchewan was made when Hon. J. G. Taggart visited agricultural officials in Minn. tomorrow and Park. The Taggart is Saskatchewan Minister of Agriculture.

By this means, Saskatchewan became linked in an inter-state movement in the United States embracing 15 states.

Joint action on the part of Western Canadian provinces may result in an international line-up by which the state and provincial governments will be empowered to control the level of waters in the Rainy lakes water shed. It was announced at Ottawa.

Meteorites, although blazing hot during part of their fall to earth, cool so rapidly when entering the surface that they have been known to fall into a hay stack without causing it to ignite.

Of every 100 persons in the Indian empire, 88 are Hindus, 22 Mohammedans, three Buddhists, three followers of the religion of their tribes, one is a Christian, and one a Sikh.

A Canadian Visits The U.S.

Mr. G. S. Anderson, Of Ottawa, Writes To The New York Times

We liked the easy friendliness of your people and the courtesy of American officials whom we encountered. We liked your highways and we liked your drivers. They drive fast, but they drive well. We thoroughly enjoyed your scenery, your beaches, your resorts. We liked your coffee and we liked your tea, which is sometimes malign by Englishmen and even Canadians. We could go on all day outlining things which appeared to us.

We did not like being classed as foreigners. When you come to Canada, as you do in thousands each year, we do not look upon you as foreigners—cousins, perhaps, at least our guests, but not foreigners.

Another thing that all Canadians had and saying is the fact that you don't like our money. Close to the boundary our currency is accepted in small denominations, though not with any degree of favor. Ten per cent exchange is levied on notes of five dollars or larger. Further inland Canadian currency is only rarely accepted at all.

Being the business men that you are I know that you will welcome this little criticism and, I hope, take steps to rectify a condition which is very annoying to tourists from north of the international boundary.

Training For Youth

Quebec To Set Aside Large Sum For This Purpose

Hon. Joseph Blaisard, Quebec minister of municipal affairs and trade and commerce, said the province will present a 1,000,000 next year in furtherance of its policy of vocational training for youth, and will endeavor to train in business and industry.

Addressing the Quebec Federation of Chambers of Commerce, the minister said the plan, started with \$120,000, was increased to \$325,000 this year and next year will be increased to \$1,000,000.

Took Many Months

Scientists restored the skull of the prehistoric baluchitherium from 900 bone fragments that were dug up in the Gobi desert. It took one man seven months to piece the complicated "jig-saw" puzzle together.

"Spilling bees" which have been popular recently in South Africa are being succeeded by "pronouncing bees."

UNCLE SAM, TOO, BRUSHES UP HIS DEFENCES

Although the United States is some thousands of miles removed from the powder-keg of Europe, her defenses are put into good shape and soldiers are being trained rigorously. In the above photograph infantry of the Third Corps Area are shown at Fort Meade, Maryland, as they set up a 50 calibre anti-tank gun capable of penetrating the heavy armor of a tank.

Railway Problems

Extra Service Necessary In These Days Of Keen Competition

It was interested to read in a recent issue of the Railway Employers' Journal the story of a lady and her baby. A prospective passenger on a long western trip, the lady went to a representative of a certain railway with a problem. She had a very young baby and she had to be assured that a supply of its particular kind of milk would be available under refrigeration.

The railwayman, the article says, "figured the number of days and hours the trip would require, arrived at the quantity of milk necessary, reduced it to bottles, informed the mother where she could purchase a container to accommodate that number of bottles, and made arrangements with Pullman porters for pre-icing and icing on the trip."

The point of the story is that the traveler had gone to a passenger representative of another road with the same problem and had been told, "Lady, I don't know anything about babies. I am in my line."

The trouble was, the second man was an old-fashioned railwayman. He thought to understand that in these days of keen competition the man who gets the business is the man who is prepared to be courteous, to give that little extra service that makes friends. Like every other business, the railways cannot afford to be indifferent. They serve the public and serving the public means much more than carrying passengers especially in such a time as this. Everything that will add to their comfort is "in my line" to the railwayman.—Canadian National Magazine.

Speed And Reflection

Tempo Of Actions Is Hapless Of How You Feel

Success or a bit of good luck which brings happiness to the tempo of our actions. If a man has sudden cause for rejoicing he walks with a springy step until the joy is over. If a man has sudden cause for grief he walks with a heavy step until the grief is over. The tempo of our actions has to have effect on the foot that presses on the gas pedal. Some interesting facts were found in a British police court on a recent Saturday.

Case No. 1 was that of a young woman who pleaded guilty to driving at 50 miles an hour in a city area where the speed limit was 30. Her excuse was that she felt "exuberant" as the date of her marriage approached. Her exuberance cost her \$200 and four months in jail.

No. 2 was that of an Aberdeen man who was mugged \$10. "I was speeding," he pleaded. "I was in a hurry to get home." Even an Aberdeen man might feel it was worth \$10.

No. 3 was a girl whose car obstructed a pedestrian crossing and she was excited because she was "on my way to a jeweller's to collect her engagement ring."

Then there was a man who stopped too hard on a street, "because it had just been notified of a job. Ten dollars must come out of his first pay envelop."

A young officer was fined no less than \$200 and \$10 costs for driving dangerously while under the influence of liquor. He was Mr. Horatio Belsham, Minister for War, had been kind enough to give officers a raise of pay and he had been "celebrating."

—St. Thomas Times-Journal.

Have Run Into Trouble

Scientists Strike Snag After Breeding Chickens Without Feathers

Science has run up another blind alley at the poultry department of Cornell University.

Jugglers at that seat of learning have succeeded in breeding a type of chicken without feathers. But, having bred them, says the Detroit News, it was discovered that the cost of heating hen houses to prevent nudity from running on into pneumonia far exceeded the cost of removing the pin-feathers from normal fowl.

It is all very baffling, and reminds one that we have bred a race of women who, lured to sterility in most circumstances, 2 nevertheless most circumstances, nevertheless the progress of human progress is inadequately marked with detour signs.

Gloom For The Millions

Each year the United States imports and consumes 84,000,000 pounds of castor oil. The Agricultural Chemical Association is planning to try large-scale cultivation of castor plants in 32 states, figuring domestic manufacture of castor oil will lower prices and increase consumption to 400,000,000 pounds a year.

Mrs. Wilkes: "I see your husband never gets out at nights." Mrs. Salmon: "No, he isn't."

THE BOY WHO WAS ALWAYS BOLD

COURTNEY RYLEY COOPER

COPYRIGHT-COURTNEY RYLEY COOPER. •• W.N.U. SERVICE

CHAPTER V.—Continued

Mr. Joyce laid aside her green cigarette holder and with that queer, colicky, acquiescent mood which seemed a part of her, joined the rest of the group on the tiny verandah. The moon had risen shimmering the great expanse of Sapphire lake, lying now like an irregular plate of silver between rugged mountains of black velvet.

"It's an inlet, over there to the right," Hammond said. "Land on that and you'll be safe."

"Safe?" broke in Ray, with a little laugh. "From whom?"

"The Mounties. This is a booze trip, isn't it?"

Ray faced the aviator. "Timmy? You haven't gone in for bootlegging already?"

The tone was jesting, but Timmy was tired.

"It isn't against the law to bring liquor from American territory to Yukon territory. I'm not smoking anything into Canada."

"Who's this fellow who hired you?" Hammond asked. Curiosity pulled hard at him; he was sure it was the man who had frightened Jeanne Towers. Timmy rubbed his round face.

"Banned if I know. He said his name was Lew Sade. I think he works for Around the World Agency."

Ray laughed, somewhat harshly. "So that's what becomes of our darling Timmy. He comes into the west, unfettered North and immediately becomes a bootlegger."

"It was badly timed. Timmy Moon's nerves were raw from a long season at the stick."

"Well, at least I'm honest about it. I'm not being a damned pretender!"

"Why, Timmy?" asked Kay, with an air of amazement. Who's pretending?"

"We're all here pretending," said Timmy Moon. Jack caught the scent of liquor on his breath; and evidently Lew Sade, whoever he had been, was gone. "And I'm sick of it. We're up here and let's be honest as to why we're here."

"Timmy?" in the reflected light of the doorway, Hammond said that the girl's face had gone white; there was rage in her eyes. The aviator did not notice.

"Don't Timmy me!" he exclaimed. "We're all broke and we might as well say what we broke and be done with it."

"Perhaps you'd better go to bed," said Mrs. Joyce to her husband. "I think that's a good idea." Hammond took him by the arm. "Time for us to go, Timmy."

"Oh, all right." The round little pilot was grinning again. "I didn't mean to start any fireworks. Hammond pulled him off the verandah and with an effort at a jolting good-night to the two women, led him down the trail."

"Borry I can't put you in my cabin," he apologized, when they were well along toward town. "But we've only got two bunks there."

"Oh, I couldn't go, anyway. I've got to get out too early." Timmy rubbed his hand over his face. "Wow, how a couple of shots can hit a fellow when he's tired."

"You rather slipped out of turn up there at the house," the miner suggested.

Timmy raised his head, pulled him down for air.

"Yeah, I guess I did," he confessed.

PATENTS

AN OFFER TO EVERY INVENTOR. List of Inventions. The CANADIAN PATENT COMPANY, Registered Patent Attorneys, 1100-1102, Ottawa, Canada.

It was just like seeing a ghost. Did you hear me? I almost shrieked. The poor fellow must have thought I'd gone crazy. I did feel like an idiot."

Hammond agreed that it was indeed a silly feeling. Soon he moved, again to take the trail up to the cottage. But he carried with him an uneasy presentiment that Jeanne Towers had not told the truth.

Ray was waiting for him, as well as the rest of the party. He came from a beautiful parlor. Hammond watched the sun play on her barest head, and with her mother, they went down the trail. Then at last, on the banks of Loon creek, the man pointed out the claim which he had saved for her, a stretch of gravel extending along the stream near where upturned stones and earth told of the workings held by McKenzie Joe and himself.

"I got them as near mine as I could," he announced.

"And this is a claim?" asked Kay. "Why, it's just the bank of the stream!"

"Look," Hammond answered. All along the creek were evidence of labor. Here and there, disregarding the high water, men labored at the digging of earth into long narrow sluice boxes which, picking up the water from a flume running from a higher point in the stream, carried it down on a slow slide.

"You just wait it through and it becomes gold," Ray said curiously.

"Not that," Hammond said. "It's just like a day laborer's job," he mother reflected.

A shout answered her, from upstream, where the raw-boned Ojibwa and two partners were working. Instantly the men began to move. Necks craned. Heads appeared above the higher portions of earth, where the stream temporarily ran between cut banks. Then men began to converge upon the sluice box.

"Let's go up," Hammond exclaimed. "Olsen's found something in the clean-up."

"The clean-up?" Kay asked, hurrying to the bank.

"The clean-up," Kay asked, hurrying to the bank. "The clean-up," Kay asked, hurrying to the bank. "The clean-up," Kay asked, hurrying to the bank.

"The clean-up," Kay asked, hurrying to the bank. "The clean-up," Kay asked, hurrying to the bank. "The clean-up," Kay asked, hurrying to the bank.

"The clean-up," Kay asked, hurrying to the bank. "The clean-up," Kay asked, hurrying to the bank. "The clean-up," Kay asked, hurrying to the bank.

"The clean-up," Kay asked, hurrying to the bank. "The clean-up," Kay asked, hurrying to the bank. "The clean-up," Kay asked, hurrying to the bank.

Noted Naturalist

Jack Miner Guards The Future Of

(By Lance Connelly)

Little did Kingsville folks realize the development that was to come when Jack Miner established his bird sanctuary 35 years ago. To-day he is one of the best known citizens in the Dominion of Canada and visitor to the sanctuary number thousands annually.

The white-haired naturalist with the bristly woodman's stride is as well known in Vancouver as he is in Halifax. And as well known as himself are the many sanctuaries and centers of wild life conservation that have arisen as a direct result of his activities. Not only many individual refugees for birds been established, but many government sanctuaries have also been created.

Prevention, not cure of the ill of man's relationship to his wild comrades is the naturalist's aim, and he has secured wholehearted co-operation from many of the hunters whose game he has thought opposed to his activities. More than 400,000 acres, states Robert Wilkie, in the New York Sun.

Build on the Clyde, a narrow stream, if ever, and launched into water which is a full 200 feet narrower than the ship itself, the John Brown shipyard are forced to blast out the additional feet from the opposite bank to allow her stern to sink and the ship herself to be turned around. This would be routine enough, save for the fact that the same thing had to be done for the Queen Mary. The banks, however, all in. Curd cannot build ships. The result is there is a fine time on the opposite banks, with blasting and all and the natives never quite knowing where the shore line is to be the next morning.

At the moment, we understand, they are holding their collective breath and wondering when, if ever, they will be allowed to pursue their heretofore peaceful ways and perhaps catch a fish or two before Curd is up and at them again.

This simple woodman with such clear-cut views on conservation, and his own simple life, yet only this week he followed a tractor and died in preparing ground before his home for floor planing. Few passing motorists recognized the sturdy figure in the broad-brimmed straw hat and the simple overalls as the noted naturalist.

Possessions Of Famous People

Souvenirs Which Would Be Valuable

Have Not Been Preserved

Sir Hesteth Bell has had a varied pre-occupation career. It ranged from the Bahamas to Uganda, where he was the first Governor. He is now in the U.S.A. and has been a member of the Chamberlains. Joseph Chamberlain left his historic eyeglasses as a memento of which it is really intriguing problem what actually happened to the distinctive possessions of famous people. What has happened, for instance, to the late Lord Haldane's walking stick, made of high explosive, which used to put the wind up for M.P.s? Who now possesses the late Earl Balfour's fiddle, in which that great philosopher went to amuse himself in leisure moments? Are any of the G.O.M.'s much-courted Gladstone collars still in existence?

Some souvenirs of this personal genre no doubt find their way to the museums but there are a legion of others.

Just A Mystery

Slipping an ice-cream soda in a Leggett store in New York, a girl noticed a sign posted on the fountain. "Chocolate served here."

"By a simple, direct girl, she asked the soda clerk what it meant. "They sent the sign to us, mister," he said wearily, "but they never sent any explanation."

According to a British medical expert, crying is healthy because tears are the most powerful germicides in existence.

Nervous?

Do you feel so nervous you want to scream? Do you feel so nervous you want to scream? Do you feel so nervous you want to scream? Do you feel so nervous you want to scream? Do you feel so nervous you want to scream?

Do you feel so nervous you want to scream? Do you feel so nervous you want to scream? Do you feel so nervous you want to scream? Do you feel so nervous you want to scream? Do you feel so nervous you want to scream?

Do you feel so nervous you want to scream? Do you feel so nervous you want to scream? Do you feel so nervous you want to scream? Do you feel so nervous you want to scream? Do you feel so nervous you want to scream?

Do you feel so nervous you want to scream? Do you feel so nervous you want to scream? Do you feel so nervous you want to scream? Do you feel so nervous you want to scream? Do you feel so nervous you want to scream?

Do you feel so nervous you want to scream? Do you feel so nervous you want to scream? Do you feel so nervous you want to scream? Do you feel so nervous you want to scream? Do you feel so nervous you want to scream?

Nothing Wrong With It

"Purge" Still Is Considered A Perfectly Good Word

A woman in New York writes to her favorite newspaper to say that she doesn't like the word "purge." She wonders why so many political writers in this country have "casually seized upon it" and show a liking for verbal expressions of a nation whose law and institutions are so at variance with ours.

Apparently she thinks that "purge" comes out of Germany or the Soviet Union or China, where the thing it stands for is known, but the word itself is not.

The ancient Roman used the verb "purgare" or "to make pure." The French took it up and passed it on to the English.

Shakespeare and the King James Bible refer to "purges" and "purgings."

The first use of the word in its present political sense appears to have been in connection with "Frisch's Purge."

Gen. Thomas Price was deputed by Cromwell in 1648 to "purge" the House of Commons by ejecting from it all members who refused to vote as Cromwell wished them to.

Writing distinguished pedigree behind it, why should anyone in this country object to the adoption of this very ancient and venerable word?

The American political vocabulary?—Detroit Free Press.

A Changing Shore Line

Launching Of Big Ships Keeps Banks

Of Clyde Moving

If any one thinks for a moment that he or she can escape the new ships which are coming out, they just have been about where the miniature shipyard smoke blows the monster. Of all the tales we like, particularly, is the one of the new Queen Elizabeth, states Robert Wilkie, in the New York Sun.

Build on the Clyde, a narrow stream, if ever, and launched into water which is a full 200 feet narrower than the ship itself, the John Brown shipyard are forced to blast out the additional feet from the opposite bank to allow her stern to sink and the ship herself to be turned around. This would be routine enough, save for the fact that the same thing had to be done for the Queen Mary. The banks, however, all in. Curd cannot build ships. The result is there is a fine time on the opposite banks, with blasting and all and the natives never quite knowing where the shore line is to be the next morning.

At the moment, we understand, they are holding their collective breath and wondering when, if ever, they will be allowed to pursue their heretofore peaceful ways and perhaps catch a fish or two before Curd is up and at them again.

Request Market Survey

Prairie Provinces Ask Investigation

Of Canada's Live Stock Industry

A complete investigation of Canada's live stock industry was asked in a motion passed by a conference attended by representatives of the three Prairie Provinces last week. The resolution, moved by Hon. D. H. Campbell, Minister of Agriculture for Manitoba, and seconded by Hon. D. H. Muller, Minister of Agriculture for Alberta, was passed with the objective of obtaining greater stability for the Canadian live stock industry through eliminating extreme price fluctuations and transportation and production difficulties.

The conference, sponsored by a committee set up by the Manitoba government, last winter, was one phase of the work being done by that committee. Already market studies have been made in the U.S. and Minnesota have been studied. Dr. J. A. Munn, M.L.A. for Dufferin, in chairman.

Claims World's Record

Australian Farmer Sows 920 Acres

Of Wheat In 120 Hours

An Australian farmer in Victoria has just sown 920 acres of wheat in 120 hours, which he claims to be a world record. For six days he worked night and day with a tractor, travelling seven or eight miles an hour. Four men worked the tractor in six-hour shifts.

Frees Men Touched

Pure water, standing quietly in a large tank, doesn't always freeze at the freezing point of 32 degrees. Indeed, in such circumstances, pure water has been known to remain liquid until the temperature went down to zero. But the instant the water's touched, it turns to ice.

The sea cucumber, a relative of star fishes, sheds portions of its body when it becomes scarce and replaces them when times get better.

The royal mint of Great Britain has been found to have an exception of France and Germany.

COMFORT! CONVENIENCE! SAFETY!

with a JOHNSON HORSE

Brilliant Electric Light

Cognate Dependable Power

Now! at low cost (as low as \$49.00) with a new Johnson. Chatterbox, the comfort and convenience of a battery. Find your horse, build your own, or purchase a complete light and generate ample power for the home and commercial use.

Dated at Carbon, Alberta, this 30th day of August, 1938.

ALEX REID,

Secretary-Treasurer

Miccadoo
Says --

The sting of a bee is a swell affair.

Teacher: "Define 'courtship'." Smart lad: "A man running after a woman until she catches him."

A pretty lather had gone to undress when she called to her young man friend: "Jim, I've forgotten my cigarette case."

"Never mind," he replied, "I have plenty of cigarettes."

"Yes, but my bathing suit was inside mine."

"Only fools are certain, Bobby; wise men hesitate."

"Are you sure of that, Pop?"

"Yes, certain of it."

Cooking schools are like churches—the ones that need most to go, stay away.

There is nothing like the spark of love to burn a hole in the boy friend's pocket.

Snicklefritz----

Girl Friend (admirably): How in the world do you think up such funny jokes, Bill?

Bill: I sit down and laugh, and then think backwards.

A man on receiving his dessert in a restaurant, found a fly in his ice cream, and called the waiter's attention to it. The waiter said: "Serve the littleascal right; let him freeze to death; he was in the soup yesterday."

"Half the Town Council are Crooks" was the glaring headline.

A retraction in full was demanded of the editor under penalty of arrest.

The next week the headline read: "Half the Town Council Aren't Crooks."

I have solved the mystery of what a hotel means when it advertises rooms \$1.00 and up.

"What is it?"

"I got one of the dollar rooms and was up all night."

"I fear," the struggling dentist sighed, "that I'm a total loss. I've built a lot of bridges—but folks won't come across."

Neighbors used to drop in for a call, now they call in for a drop.

"Whenever my wife needs money she calls me handsome."

"Handsome?"

"Yeah. Hand some over."

He told me the old, old story Until I believed it true, But after we were married Any old story would do.

Two youngsters were visiting a museum for want of some more exciting occupation. The exhibits did not excite them very much until they came round a corner and gazed upon a well-preserved mummy, swathed in bandages. Underneath was a card with

Commercial Printing

Do not try to economize on necessary expenses. Neatly printed business stationery is just as important to your business as any other of your necessary expenses, and it is poor economy to do without it. Blank writing paper and forms on which your name is written in with ink do not raise the prestige of your business. And if it's economy that you want, see us and find that our new prices are most reasonable.

YOUR COUNTRY NEEDS YOU

Perhaps you shrink from these words; and who can blame you? They recall all too vividly the patriotic fervor of a nation in arms and the epilogue of horror and heart-break. But, although the call is more urgent for your help in a crisis, your country needs you just as surely in the cause of peace and progress. If you and your neighbors are prosperous, your country prospers. If you and your neighbors are well informed and progressive, the whole country reaps the benefit.

Greater progress, higher standards of living, better ways of life, are possible to an informed people. It is your privilege to be informed fully on all matters of importance through a free press. Make full use of this freedom, denied in so many other countries. Be informed. Keep a voice in your own government.
